Sustainable Ecotourism

Eco-Tourism
Agriculture
Environment

The Story

Reunion (Lam Shamel) is a unique initiative that combines environment care, agricultural tourism and rural development in one hub. It will be built on love and passion for the environment and community development. The entire place will reflect a personal challenge of a Palestinian family living under occupation.

Facilities and Services

- Eco-friendly accommodation.
- Aquaponics Farm.
- Bird Sanctuary.
- Crafts Workshop.
- Multipurpose Hall.
- Outdoor Activities.
- Events and Exhibitions.

Features

- Solar Power.
- Rain Water Management System.
- Recycling Facility.
- NGOs Services.

GIVE BACK

We promise to give back 5% of our annual income back to the local community in the form of initiatives to develop natural resources and improve our surroundings.

Our Mission

- ◆ Create an accommodation ecofriendly hub to support and promote **local ecotourism**.
- ◆ Introduce **innovative agricultural technologies** to promote ecofriendly agriculture and combat climate change.
- ◆ Contribute to the **local rural development** by increasing access to collaborative markets.

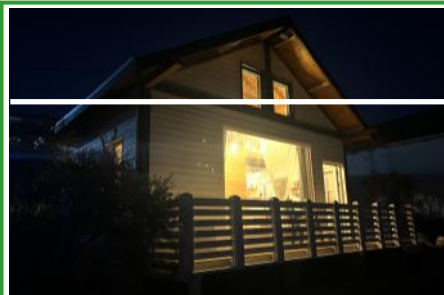

Progress

Phase 1

Completed

Land acquisition, Solar power, rain water management system.

Phase 2

In progress

Cabin accommodation, aquaponics farm, birds farm

Phase 3

In progress

Multipurpose hall, crafts workshop, outdoor activities

Facilities and Services

■ Eco-friendly accommodation.

3 cabin units with the capacity of hosting up to 20 guests. An expansion of 3 more units is planned in the near future.

■ Aquaponics Farm.

450m³ of aquaponics farming space to produce fresh leafy vegetables and fish.

■ Bird Sanctuary.

A bird farm to produce local birds such as partridge, quail, goldfinch as well as exotic foreign birds such as canaries, cocktails and budgerigar.

■ Crafts Workshop.

A fully equipped working space to produce crafts, recycling and conduct learning activities.

■ Multipurpose Hall.

100m² meeting space for workshops, events and indoor activities.

■ Outdoor Activities.

Guided tours, hikes, trekking, yoga and wild life watching.

■ Events and Exhibitions.

Annual and seasonal events to promote eco-tourism and increase access to markets for local producers and cooperatives.

Rain Water Harvesting

The project already constructed a rain water collection system with a capacity of 100m³. The rain water will be treated to cover the agricultural needs as well as other human needs. The project intends to expand the system in the coming two years to reach a capacity of 300m³.

Recycling Facilities

The project will endeavor to recycle close to 85% of waste in different forms such as food waste through composting, plastic and glass through crafts, paper and cardboard will be sold to external service providers. The place will also adopt a policy to reduce and reuse as means to raise public awareness of recycling.

Solar Power

The project is currently running on 6Kw full solar power system. Gradually the project will increase its capacity to reach 20Kw aiming to run on 100% solar power 24/7.

NGO's Services

The project aims to provide preferential services to both local and international NGO's and UN agencies operating in the country. The package will include utilization of all project facilities for community development activities at a discounted price. Staff of NGO's and UN agencies will also enjoy a discounted price when using the facilities for personal purposes.
